

## South Shore Hospital Facility Locations

In addition to the Hospital itself, South Shore Hospital operates several satellite outpatient facilities. All locations are included in the Hospital's license.

Non-hospital physicians and other clinical professionals may also work at some of these locations. Patients receiving care at these facilities may receive bills from both the Hospital and non-hospital physician practitioners. While encouraged to do so, non-hospital physicians are not required to comply with South Shore Hospital's Credit and Collection and Financial Assistance Policy.
